WH Energy-Saving Program electric vehicle (EV) charging options

Charge your electric vehicle at a time convenient for you.

Wright-Hennepin (WH) offers three different Energy-Saving Programs for electric vehicle (EV) charging.

Option 1: Electric Vehicle Overnight Storage Charging Program*

- Energy rate during charging time is \$.06434 per kWh.
- Charging time is approximately eight hours per day, from 11 p.m. 7 a.m.
- Charging is not available all other hours.
- Energy rate is not subject to Power Cost Adjustment (PCA).
- May require a separate meter socket to be installed on the outside of home.
- The EV must be all-electric and have a minimum of 4.5kW charger rating to qualify.
- Requires the use of a hardwired, 240-volt, wall-mounted Level 2 charging station.

Option 2: Electric Vehicle Time-of-Use Program*

- Energy rate varies based on time of day EV is being charged.
 - 5:00 a.m. 5:00 p.m. @ \$0.12782 per kWh
 - 5:00 p.m. 10:00 p.m. @ \$0.30154 per kWh
 - 10:00 p.m. 5:00 a.m. @ \$0.06434 per kWh
- Charging is available 24/7.
- Energy rate is not subject to Power Cost Adjustment (PCA).
- May require a separate meter socket to be installed on the outside of home.
- The EV must be all-electric and have a minimum of 4.5kW charger rating to qualify.
- Requires the use of a hardwired, 240-volt, wall-mounted Level 2 charging station.

Option 3: Electric Vehicle Subscription Program*

- \$35 each month for charging your electric vehicle between the times of 10:00 p.m.- 5:00 a.m.
 - Energy rate varies when EV is being charged other times during the day.
 - 5:00 a.m. 5:00 p.m. @ \$0.12782 per kWh
 - 5:00 p.m. 10:00 p.m. @ \$0.30154 per kWh
- Cost is \$35 per vehicle. If a household owns two EVs, the cost is \$70.
- Charging is available 24/7.
- Energy rate is not subject to Power Cost Adjustment (PCA).
- May require a separate meter socket to be installed on the outside of home.
- For this program only, the vehicle may be all-electric or a plug-in hybrid (PHEV). It must have a minimum of 4.5kW charger rating to qualify.
- Requires the use of a hardwired, 240-volt, wall-mounted Level 2 charging station.

Enrollment in an electric vehicle charging program is required to receive a rebate.

Rebates are available through WH, and Conservation Improvement Program (CIP) funding.
